

LS2 Circ

Smart Circulation for Schools

LS2 Circ combines core circulation functionality with the convenience of a Web-based product. Because LS2 Circ is Web-based, there's no need to install anything before deploying the product in your media center: at the Circulation desk, on the library floor, or anywhere else with Internet access.

LS2 Circ features a user-friendly interface with color themes ("skins") that you can choose from and easily change out. Minimal training is required to use LS2 Circ, making it easy for staff and even student helpers to use.

Smart Workflows

LS2 Circ's smart workflows include features in the areas of:

- **Hold Requests** Staff can easily place a request for the First Available copy, or if further limiting is required, you can limit a hold request to specific schools or even specific copies.
- **Custom borrower fields** LS2 Circ allows you to keep track of data related to your students, for example, class schedules, parent, or guardian.
- **Responsible party** You can easily link students to a responsible party, such as homeroom or teacher.

Self-Checkout

Students have a choice of two self-checkout methods. They can check out their items by scanning their barcodes, scanning the items, and then scanning the "clear screen" barcode when they're finished. The second method allows students to choose their teacher's picture, and then choose their own picture from the class list to proceed.

Class Set Functionality and User Defined Tabs

Do you need to request 15 copies of a title from across the district? Simply place a hold request and enter the number of copies needed. LS2 Circ determines where the copies are available and sends requests to the appropriate schools.

LS2 Circ provides four district-defined, configurable tabs providing links to Web applications. Tabs provide easy access from LS2 Circ to your school district's OPAC, TLC's Reports Manager, Internet search engines like Google or Yahoo, or any other site. Standards compliant sites will maintain their view when you switch between tabs, so you can easily move back and forth between different applications that you're working in.

To learn more about LS2 Circ in your school, call TLC at 1.800.325.7759.
