

Textbook Management and Asset Tracking

The efficient solution for managing school inventories

The Library Corporation offers a Web application that allows your school district to easily manage its textbooks and other valuable assets. TLC's Textbook Management and Asset Tracking is an affordable add-on module that simplifies the task of distributing and accounting for textbooks and other district-owned items such as calculators, computers, and even padlocks.

Textbook Management and Asset Tracking gives you the ability to quickly and easily add new titles, update the conditions of school-owned items, and assign materials to students and faculty. It features a dashboard-style interface that displays material conditions, district-wide inventories, and statuses and locations of textbooks and other school assets. The program can produce reports for an entire district or individual schools to show what items are checked out to which students at any given time.

Empower your school district to comprehensively oversee materials, identify additional or limited inventories, and save time and money.

Textbook Management and Asset Tracking is offered as an optional add-on that is incorporated into the interface of TLC's Library•**Solution for Schools**, an integrated library system with powerful features designed to streamline the district-wide administration and maintenance of school media centers. To learn more about Textbook Management and Asset Tracking or Library•**Solution for Schools**, visit www.TLCdelivers.com, e-mail info@TLCdelivers.com, or call 1.800.325.7759.
